0. Dark rules, vermilion alerts

- People plan to act patiently
- **Present bias:** an extra discount on "now"
- Demand for commitment rises

	Model 1	Model 2
Treatment effect	0.281	0.895
	(0.044)	(0.052)

▸ Robustness

Hypothesis 1

The treatment lowers present bias: $\beta_{\text{treat}} < \beta_{\text{control}}$
